

REMARKS

This is in response to the outstanding species restriction requirement dated February 21, 2006. Applicant hereby elects the fluorescent dopant represented by formula 1c and the host for that dopant represented by formula 3c. This combination is represented by Examples 2 through 5. In reviewing for this Election it came to Applicants attention that Example 5 incorrectly identifies blue fluorescent emitter as "5c" rather than --1c-- and incorrectly identifies the host for the fluorescent emitter as "8b" rather than --3b--. There are no fluorescent emitters identified as 5 and no hosts identified as 8- so it is clear they should be 1c and 3c respectively. The formal amendment and remarks follow. The error occurred as a result of not correcting the text for Example 5 when the identifiers earlier in the case were renumbered and renamed. The corrected identifiers are the same as for Example 2.

Formula 1c corresponds to general formula 1a with each terminal phenyl ring bearing one para methyl group. Claims 1-5, 8, 9, and 14-34 read on this species. Formula 3c corresponds to formula 3 with W₉ being 2-naphthyl and W₁₀ being 4-biphenyl. Claims 1-16, 18-21, and 24-34 read on this species.

Respectfully submitted,

Attorney for Applicant(s)
Registration No. 25,518

Arthur E. Kluegel/dlm
Rochester, NY 14650
